

APEX 16-INCH DISK SANDER & GRINDER • MODEL 1-A

For Sanding Wood, Plastics • Grinding Metal

APEX combines the best in high grade sanders with exclusive features all its own . . . features like the Apex Tilt-Back Guard, slot-free table, and squaring bracket. A precision-built machine for production use, with easy to reach controls and speedy, accurate adjustments.

COMPARE THESE FEATURES...

***TILT-BACK GUARD—(A)** Greater protection, because it covers the top and a greater circumference of the wheel. Never gets in the way, as it tips back when work is applied across the full face of disk.

***LARGE SIZE TABLE—** Plenty of room for large size work on this generous $10\frac{1}{4} \times 22\frac{1}{2}$ " table. It extends a full 3 inches beyond the disk and $3\frac{3}{4}$ inches back of it.

***BLOWER OUTLET—** A blower is easily attached to Tilt-Back Guard (at D), assuring greater freedom from dust. A dust bag may be attached under the table (at F).

***NO HAZARDOUS SLOT IN TABLE—** Statistics show slots of the type found in most machines, are the cause of many accidents. Unique arrangement of miter gauge (See B) eliminates this danger.

***SQUARING BRACKET—(C)** This adjustable bracket makes it easy to square up the table after tipping—quickly and absolutely accurately. It also helps support the table for extra heavy work.

***WORM GEAR ADJUSTMENTS—(E)** Afford accurate, easily regulated control of table vertically—and also to any selected angle.

SPECIFICATIONS

Material— Base: Heavy Cast Iron
Column: Precision Ground Steel
Table: Cast Iron, Heavy ribs underside and precision ground top
Guard: Polished Aluminum
No Die Castings are used

Dimensions— Disk: 16" diam. Table: $10\frac{1}{4} \times 22\frac{1}{2}$ "
Base: 20" diam. Column: 4" diam. x 48" high.
Table to floor: 38" at center of disk.
Overall width: $22\frac{1}{2}$ "

Standard Equipment— ~~Two~~ Steel Disks; Miter Gauge; $\frac{3}{4}$ H.P. Ball Bearing Motor (Single or 3 phase) with toggle switch; Apex Tilt-Back Guard

Adjustments— Table raised or lowered by heavy worm gearing working on substantial lifting rack set in keyway in steel column
Table tilts 45° either direction by means of a hand wheel and worm gear
Squaring bracket automatically squares table

Weight— Crated for shipment, approximately 350 lbs.
